

MEDICAL KNOWLEDGE TEACHING

Name: Robert Swantz, MD

Specialty: Neonatology

Institution: University of Rochester

Title of faculty development lecture/workshop: Introduction to Your Role as a Clinical Educator

Other area of academic/specialty interest (grand rounds topics):
Neonatology - Persistent Pulmonary Hypertension of the Newborn

Description of lecture/workshop: This 2 hour workshop is primarily intended for new educators (junior faculty, fellows) and consists of an overview of clinical teaching skills. The workshop is based on the hypothesis that effective teachers can 1) organize an educational experience, 2) interact purposefully with learners, 3) motivate learners, 4) assess learning and teaching, and 5) use assessment to enhance learning and teaching. The following principles will be introduced and explored: the educational planning process, needs assessment, teaching styles, learning styles, learning climate, adult learners, evaluation/feedback, and reflection.

Months most likely available: Most except June, July, Aug

Any travel restrictions/preferences (e.g. geographic location): None

Contact information: 601 Elmwood Ave, Box 651, Rochester, NY 14642

E mail: robert_swantz@urmc.rochester.edu

Phone: 585-275-2972

Alternate phone: 585-275-9767

Fax number: 585-461-3614

Name: Robert Swantz, MD

Specialty: Neonatology

Institution: University of Rochester

Title of faculty development lecture/workshop: Teaching in a Busy Inpatient Unit

Other area of academic/specialty interest (grand rounds topics):
Neonatology - Persistent Pulmonary Hypertension of the Newborn

Description of lecture/workshop: Medical school faculty who teach in inpatient settings must juggle multiple demands on their time. This workshop will explore cognitive and non-cognitive aspects of being an effective clinical teacher. Participants will learn a variety of teaching methods to apply to learners at different stages, and will learn techniques to effectively balance responsibilities to learners, patients, and peers.

Months most likely available: Most except June, July, Aug

Any travel restrictions/preferences (e.g. geographic location): None
